Activity 2

OBJECTIVE

To draw the graph of a quadratic polynomial and observe:

- (i) The shape of the curve when the coefficient of x^2 is positive.
- (ii) The shape of the curve when the coefficient of x^2 is negative.
- (iii) Its number of zeroes.

MATERIAL REQUIRED

Cardboard, graph paper, ruler, pencil, eraser, pen, adhesive.

METHOD OF CONSTRUCTION

- 1. Take cardboard of a convenient size and paste a graph paper on it.
- 2. Consider a quadratic polynomial $f(x) = ax^2 + bx + c$
- 3. Two cases arise:

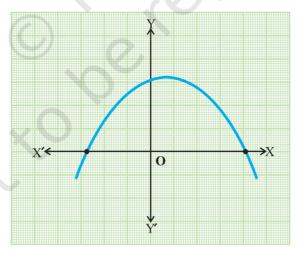

Fig. 1

(i)
$$a > 0$$
 (ii) $a < 0$

- 4. Find the ordered pairs (x, f(x)) for different values of x.
- 5. Plot these ordered pairs in the cartesian plane.

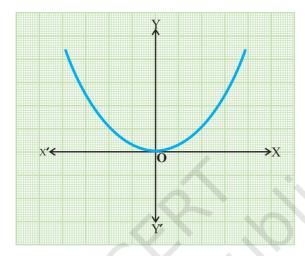

Fig. 2

6. Join the plotted points by a free hand curve [Fig. 1, Fig. 2 and Fig. 3].

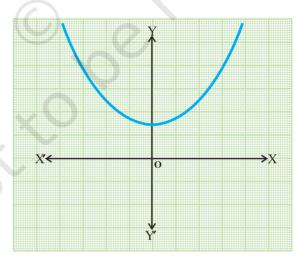

Fig. 3

Mathematics 99

DEMONSTRATION

- 1. The shape of the curve obtained in each case is a parabola.
- 2. Parabola opens upward when coefficient of x^2 is positive [see Fig. 2 and Fig. 3].
- 3. It opens downward when coefficient of x^2 is negative [see Fig. 1].
- 4. Maximum number of zeroes which a quadratic polynomial can have is 2.

OBSERVATION

1. Parabola in Fig. 1 opens
2. Parabola in Fig. 2 opens
3. In Fig. 1, parabola intersects <i>x</i> -axis at point(s).
4. Number of zeroes of the given polynomial is
5. Parabola in Fig. 2 intersects <i>x</i> -axis at point(s).
6. Number of zeroes of the given polynomial is
7. Parabola in Fig.3 intersects <i>x</i> -axis at point(s).
8. Number of zeroes of the given polynomial is
9. Maximum number of zeroes which a quadratic polynomial can have is

APPLICATION

This activity helps in

- 1. understanding the geometrical representation of a quadratic polynomial
- 2. finding the number of zeroes of a quadratic polynomial.

Note

Points on the graph paper should be joined by a free hand curve only.
